REPORT OF THE PROGRAMME

Topic	:	"Wetland Where Are You"
Resource Person(s)	:	Mr.M.Rajesh, Assistant Professor, PG & Research Department of Zoology, The American College, Madurai
Date and Time	:	04.02.2021 at 3.30 p.m
Venue	:	https://meet.google.com/wkr-hoti-spc?hs=122&authuser=4
No.of Participants	:	40

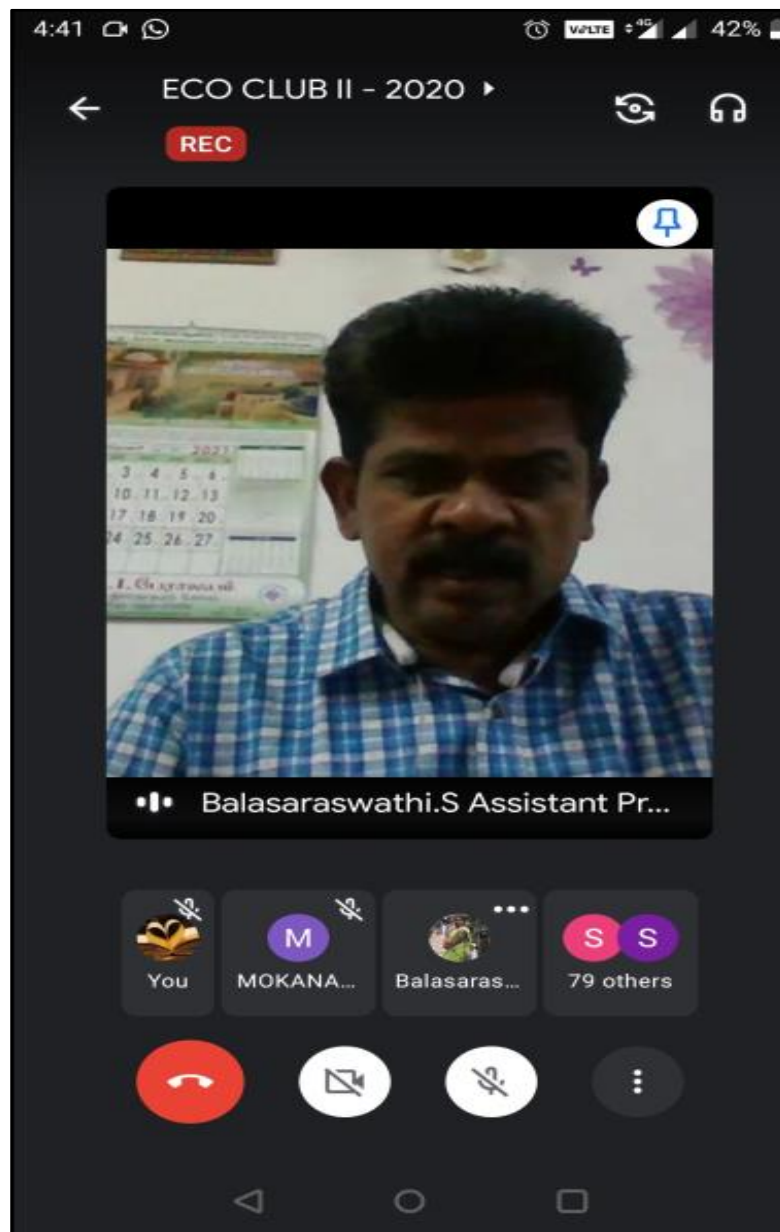

The resource person explained the importance of wetland. He highlighted the four types of wetlands: marshes, swamps, bogs, and fens. Each of these categories of wetlands is unique in its location and characteristics. Wetlands must have one or more of the following three attributes: 1) at least periodically, the land supports predominantly hydrophytes; 2) the substrate is predominantly undrained hydric soil; and 3) the substrate is saturated with water or covered by shallow water at some time during the growing season of each year. He also explained many wetlands are unique to a certain degree, as their individual characteristics are determined by a combination of factors such as climate, soils, hydrology, and vegetation. Also clarified the wetland functions are the result of interactions between the three major components of wetland ecosystems: hydrology, biology, and soils.

Outcome of the Programme

Students were able to know about the details of wetland. They also learnt about the types of wetland and importance of wetland. They learnt about the Wetland types and Wetland functions.
