Report on Energy Conservation Awareness Programme

Electricity consumption in India has increased over 50 times since 1971. Enhancing energy efficiency will be the key in controlling energy demand and transitioning towards a low-carbon future. To create awareness on energy conservation a webinar was organized for the teaching faculty (Aided & self-financing stream) on Saturday, 23rd October, 2021 by the Internal Quality Assurance Cell (IQAC) in collaboration with Veyilsakthi Solar, Madurai.

Mrs. S. Veni, M.Sc, Assistant Professor of Computer Science (SF), welcomed the gathering and introduced the guest speaker. Ms. K. Malarvizhi, CEO, Veyilsakthi Solar acted as resource person and delivered a lecture on "Saving Megawatts saves Megabucks". She created awareness on energy consumption of basic household appliances. The participants got glimpse of power consumption by different household appliances which include Lighting appliances, Kitchen appliances, Entertainment appliances, Heating, cooling and cleaning appliances. The webinar covered one of the most essential points, i.e. understanding and analyzing the electricity bill, which plays vital role in knowing ones expenditure on electricity.

In addition to this the resource person explained the importance of star label in electrical appliances. She motivated the participants to opt for higher (5) star rated appliances which consume less electrical energy, and increase energy saving potential by replacing conventional electrical appliances with energy efficient appliances. Conventional fan with energy efficient Super fan which consumes less power; Filament lamps or CFL with LED lamps; Non inverter AC with inverter AC; Non inverter refrigerator with inverter refrigerator, etc.,. She offers discount for Super fan (factory price) for teaching faculty. Dr. K. Malarvizhi, Assistant Professor of English proposed Vote of thanks.
