MINUTES OF RESEARCH ETHICS COMMITTEE MEETING

The meeting began with the formal welcome address and presentation of the report of the last year activities. Dean Research notified the points to be discussed related to the project proposals submitted in Phase II of VVVCMB-MRP Scheme 2025.

Subject Matter 1 Discussion on Review of the Project Proposals

Discussion A total of 7 project proposals were received by the Research Academia. Reviewers' remarks and queries were highlighted. A specific concern was raised regarding the proposal titled "AI-Powered Adaptive Queue Management System for a College Canteen" that lacked hardware specifications, unclear AI algorithms, and insufficient cost justification (Rs. 5,000/-).

Resolution 1 It was ensured that the reviews provided constructive feedback towards the feasibility of the proposals. It was decided that the investigators could either revise the proposal as per the review or give the explanation in RAC meeting.

Subject Matter 2 Selection of Project Proposals

Discussion The Committee carefully evaluated the 7 project proposals submitted under VVVCMB-MRP Scheme 2025 Phase II. The key parameters considered were relevance of the research problem, clarity and feasibility of objectives, novelty and innovation, and alignment with institutional research priorities and ethical standards. Interdisciplinary and environment-sustainability-linked themes were appreciated.

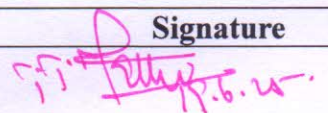

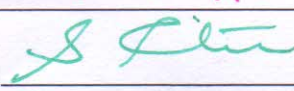

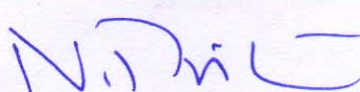

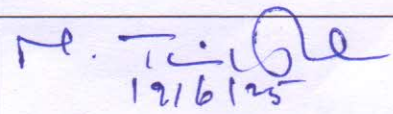

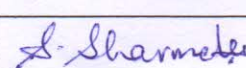

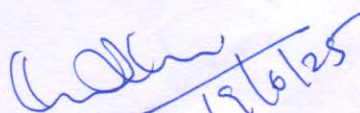

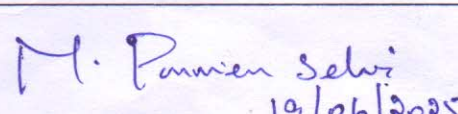

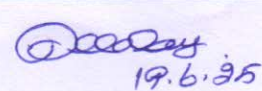

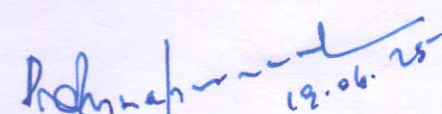

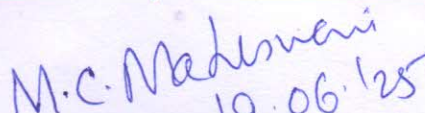

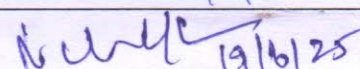

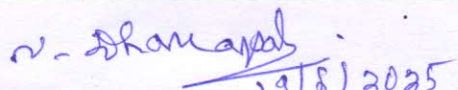

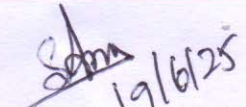

Resolution 2 It was resolved to approve financial assistance for the 4 shortlisted proposals and recommend revision where necessary. The Committee emphasized the importance of bridging research with practical applicability and adhering to ethical research standards.

Subject Matter 3 Approving the Budget of the Selected Project Proposals

Discussion The budget components of the 4 selected proposals were thoroughly examined for justification and compliance with VVVCMB-MRP Scheme funding norms. A minor concern was raised for the AI-based proposal (Queue Management System) which required a more detailed cost explanation for hardware and algorithm design.

Resolution 3

The Committee approved the budget allocations for all 4 proposals, with a recommendation for the team of Mrs. Jyothi Mani et al. to clarify the budget mentioned for algorithm.
