

V.V.VANNIAPERUMAL COLLEGE FOR WOMEN

(Belonging to Virudhunagar Hindu Nadars)

An Autonomous Institution Affiliated to Madurai Kamaraj University, Madurai

Re-accredited with 'A' Grade (3rd Cycle) by NAAC

VIRUDHUNAGAR - 626 001

OUTCOME BASED EDUCATION WITH CHOICE BASED CREDIT SYSTEM REGULATIONS AND SYLLABUS (with effect from Academic Year 2023 - 2024)

V.V.Vanniaperumal College for Women, Virudhunagar, established in 1962, offers 13 UG Programmes (Aided), 14 UG Programmes (SF), 13 PG Programmes, and 6 Ph.D. Programmes. The curricula for all these Programmes, except Ph.D. Programmes, have been framed as per the guidelines given by the and University Grants Commission (UGC) & Tamil Nadu State Council for Higher Education (TANSICHE) under Choice Based Credit System (CBCS) and the guidelines for Outcome Based Education (OBE).

The Departments of Commerce, English, History, Mathematics, Biochemistry and Tamil upgraded as Research Centres offer Ph.D. Programmes as per the norms and regulations of Madurai Kamaraj University, Madurai and do not come under the purview of CBCS.

A. CHOICE BASED CREDIT SYSTEM (CBCS)

The CBCS provides an opportunity for the students to choose courses from the prescribed Courses. The CBCS is followed as per the guidelines formulated by the UGC. The performance of students is evaluated based on the uniform grading system. Computation of the Cumulative Grade Point Average (CGPA) is made to ensure uniformity in evaluation system.

List of Programmes in which CBCS/Elective Course System is implemented

UG PROGRAMMES

Arts & Humanities	:	History (E.M. & T.M.), English, Tamil
Physical & Life Sciences	:	Mathematics, Zoology, Chemistry, Physics, Biochemistry, Home Science - Nutrition and Dietetics, Costume Design and Fashion, Microbiology, Biotechnology, Computer Science, Information Technology, Computer Applications and Computer Applications - Graphic Design
Commerce & Management	:	Commerce, Commerce (Computer Applications), Commerce (Professional Accounting), Business Administration

PG PROGRAMMES

Arts & Humanities	:	History, English, Tamil
Physical & Life Sciences	:	Mathematics, Physics, Chemistry, Zoology, Biochemistry, Home Science - Nutrition and Dietetics, Computer Science, and Computer Applications (MCA) *
Commerce & Management	:	Commerce, Business Administration (MBA) *

* AICTE approved Programmes

OUTLINE OF CHOICE BASED CREDIT SYSTEM- PG

1. Core Courses
2. Project
3. Elective Courses
 - 3.1 Discipline Specific Elective Courses (DSEC)
 - 3.2 Non-Major Elective Course (NMEC)
4. Online Course – Practice for SET/NET – General Paper
5. Extra Credit Courses (Optional)

B. OUTCOME BASED EDUCATION (OBE) FRAMEWORK

The core philosophy of Outcome Based Education rests in employing a student - centric learning approach to measure the performance of students based on a set of pre- determined outcomes. The significant advantage of OBE is that it enables a revamp of the curriculum based on the learning outcomes, upgrade of academic resources, quality enhancement in research and integration of technology in the teaching-learning process. It also helps in bringing clarity among students as to what is expected of them after completion of the Programme in general and the Course in particular. The OBE directs the teachers to channelise their teaching methodologies and evaluation strategies to attain the Programme Educational Objectives (PEOs) and fulfill the Vision and Mission of the Institution.

Vision of the Institution

The founding vision of the Institution is to impart Quality Education to the rural womenfolk and to empower them with knowledge and leadership quality.

Mission of the Institution

The mission of the Institution is to impart liberal education committed to quality and excellence. Its quest is to mould learners into globally competent individuals instilling in them life-oriented skills, personal integrity, leadership qualities and service mindedness.

B.1 Programme Educational Objectives, Programme Outcomes and Programme Specific Outcomes

It is imperative for the Institution to set the Programme Educational Objectives (PEOs), Programme Outcomes (POs) and Course Outcomes (COs), consistent with its Vision and Mission statements. The PEOs and the POs should be driven by the Mission of the Institution and should provide distinctive paths to achieve the stated goals. The PEOs for each Programme have to fulfill the Vision and Mission of the Department offering the Programme.

Vision of the Department of M.Sc. HOME SCIENCE - NUTRITION AND DIETETICS

To develop scientific, technical, research and entrepreneurial skills to uphold professionalism and ethics for bringing out successful professionals and contribute for the betterment of family and community in the contemporary world.

Mission of the Department of M.Sc. HOME SCIENCE - NUTRITION AND DIETETICS

To empower the students by providing quality education through scientific aspects of Home Science and ensure health for the family, community and nation.

Programme Educational Objectives (PEOs)

PEOs are broad statements that describe the career and professional achievements that the Programme is preparing the graduates to achieve within the first few years after graduation. PEOs are framed for each Programme and should be consistent with the Mission of the Institution.

Programme Educational Objectives (PEOs) of M.Sc.Home Science and Nutrition and Dietetics Programme The Students will be able to

- become health professionals in hospitals, fitness centres, food service industries, teachers in educational institution or to be self – employed, to enhance the quality of life of the people.
- advance in the standards of academia through research which contribute the wellbeing of the people.
- follow the professional and ethical standards in their concerned fields and work with social concern, in promoting the health status of the family and community

Key Components of the Mission Statement	PEO1	PEO2	PEO3
empower the students	√	√	√
providing quality education through scientific aspects of food science, nutrition and dietetics	√	√	√
ensure health for the family, community and nation.	√	√	√

B.1.1 Programme Outcomes (POs)

POs shall be based on Graduate Attributes (GAs) of the Programme. The GAs are the attributes expected of a graduate from a Programme in terms of knowledge, skills, attitude and values. The Graduate Attributes include Disciplinary Knowledge, Communication Skills, Critical Thinking, Problem Solving, Analytical Reasoning, Research Related Skills, Co-operation/Team Work, Scientific Reasoning, Reflective Thinking, Information/Digital Literacy, Multicultural Competence, Moral and Ethical Awareness/Reasoning, Leadership Qualities and Lifelong Learning.

On successful completion of the Programme, the students will be able to

- 1 apply their in-depth domain knowledge and practical skills in interdisciplinary fields for research-based endeavours, employment and entrepreneurship development. (*Disciplinary Knowledge*)
- 2 communicate proficiently and confidently with the ability to present complex ideas both in spoken and written forms in a concise manner to assorted groups. (*Communication Skills*)
- 3 identify, formulate and solve problems in a consistent and systematic way with updated skills using modern tools and techniques. (*Scientific Reasoning and Problem Solving*)
- 4 analyze the data, synthesis the findings and provide valid conclusion by critical evaluation of theories, policies and practices for the fulfillment of the local, national, regional and global developmental needs. (*Critical Thinking and Analytical Reasoning*)
- 5 explore and evaluate globally competent research methodologies to apply appropriately in interdisciplinary research; Develop and sustain the research capabilities to meet the emerging needs for the welfare of the society. (*Research Related Skills*)
- 6 use ICT to mould themselves for lifelong learning activities to face career

- challenges in the changing environment. (*Digital Literacy, Self - directed and Lifelong Learning*)
- 7 self-manage and function efficiently as a member or a leader in diverse teams in a multicultural society for nation building. (*Co-operation/Team Work and Multicultural Competence*)
- 8 uphold the imbibed ethical and moral values in personal, professional and social life for sustainable environment. (*Moral and Ethical Awareness*)

B.1.2 Programme Specific Outcomes (PSOs)

Based on the Programme Outcomes, Programme Specific Outcomes are framed for each PG Programme. Programme Specific Outcomes denote what the students would be able to do at the time of graduation. They are Programme-specific and it is mandatory that each PO should be mapped to the respective PSO.

On Successful completion of M.Sc. Home Science - Nutrition and Dietetics Programme, the students will be able to

PO 1: *Disciplinary Knowledge*

PSO 1.a: apply professional knowledge and entrepreneurial skills involved in the various branches of Home Science for empowering themselves and the community.

PSO 1.b: apply the obtained knowledge and skills efficiently to pursue research activities and to grab more career opportunities in educational institutions, hospitals, healthcare and service industries, food service institutions, enterprises, government and non-government organizations.

PO2: *Communication Skills*

PSO 2: interact productively and transmit technical information in a clear and concise manner to the professionals, diverse workforce and to the public by using a variety of communication strategies.

PO3: *Scientific Reasoning and Problem Solving*

PSO 3a: synthesis the scientific and systematic thinking with their hands on experience in cookery, diet planning, diet counseling, food analysis, food preservation, food safety and quality control, bakery and confectionery, textiles and clothing, resource management, interior decoration and housekeeping to promote

healthy environment in the community through various outreach programmes.

PSO 3b :apply modern techniques, updated resources and advanced technological tools to meet the needs and challenges of the contemporary society for promoting the holistic welfare of the family, community and the nation.

PO4: Critical thinking and Analytical Reasoning

PSO 4: analyse critically the prevailing issues in global nutrition in their venture to find out valid solutions through experimentation and research for the welfare of the people.

PO5: Research Related Skills

PSO 5: adopt appropriate statistical tools to analyze the data that enhances interdisciplinary research activities and find appropriate remedies for the existing health issues in the society and handling risks in enterprises.

PO6: Digital Literacy, Self - directed and Lifelong learning

PSO 6: develop higher order thinking skills and professionalism using the ICT to nurture the capability for lifelong self-learning

PO7: Cooperation/Team Work and Multicultural Competence

PSO 7: build the interpersonal qualities of coordination, leadership, time management and team spirit through their group project, industrial visit and internship that enable them to become responsible citizens which help to uplift their career to strengthen the nation

PO8: Moral and Ethical awareness

PSO 8 practice the inculcated human values, constitutional values, moral values and ethics in their personal, professional and social life for the sustainable environment.

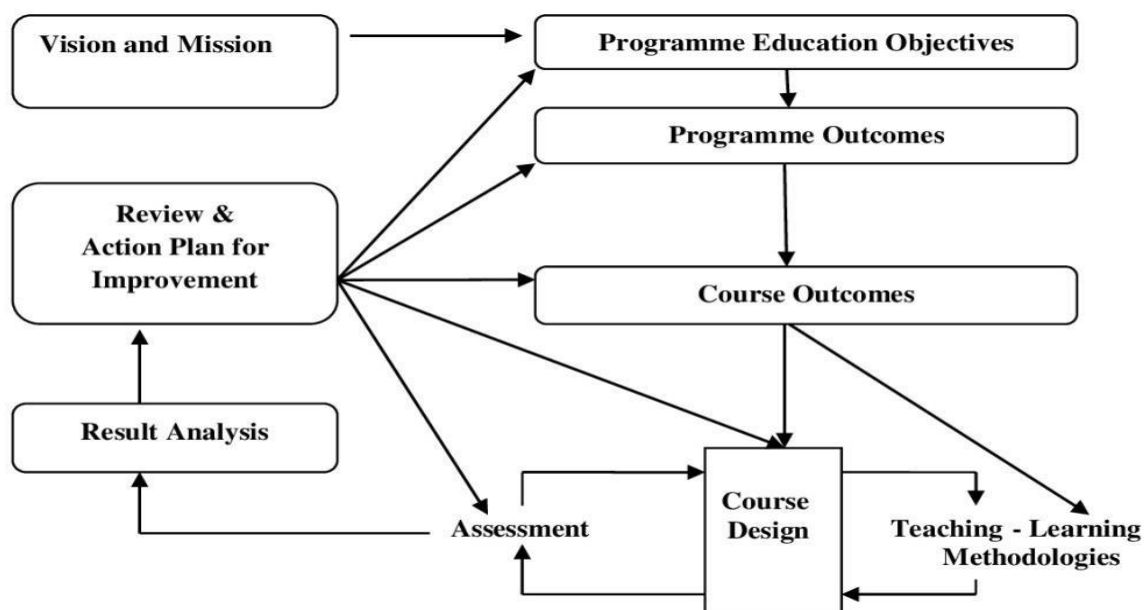

PO-PEO Mapping Matrix

Attainment of PEOs can be measured by a PO-PEO matrix. PEOs should evolve through constant feedback from alumnae, students, industry, management, *etc.* It is mandatory that each PEO should be mapped to at least one of the Pos.

PEOs POs/PSOs	PEO1	PEO2	PEO3
PO1/PSO1	✓	✓	✓
PO2/PSO2	✓	✓	✓
PO3/PSO3	✓	✓	✓
PO4/PSO4	✓	✓	-
PO5/PSO5	-	✓	✓
PO6/PSO6	✓	✓	✓
PO7/PSO7	✓	✓	✓
PO8/PSO8	✓	✓	-

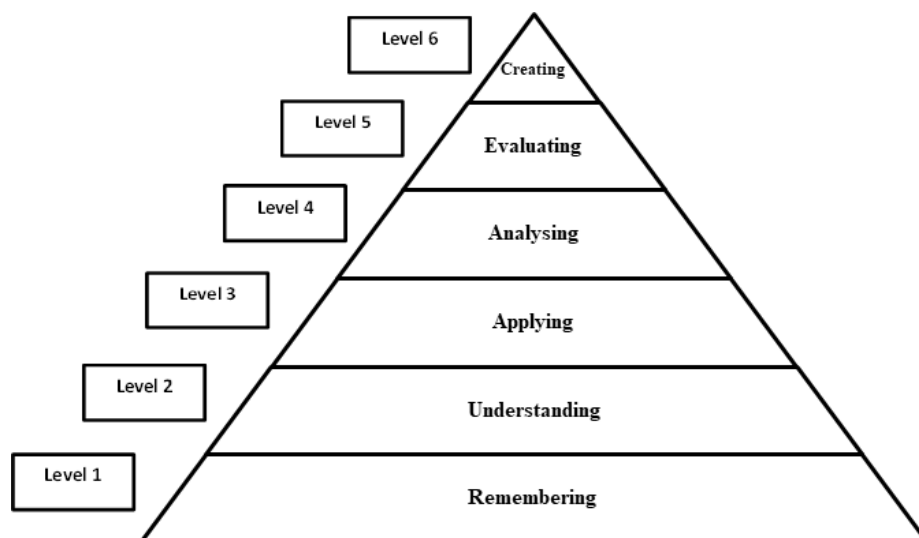

B.1.3 Course Outcomes (COs)

Course Outcomes are narrow statements restricted to the course contents given in five units. Course Outcomes describe what students would be capable of, after learning the contents of the Course. They reflect the level of knowledge gained, skills acquired and attributes developed by the students after learning of Course contents. COs are measurable, attainable and manageable in number. COs contribute to attain POs in such a way that each CO addresses at least one of the POs and also each PO is reasonably addressed by adequate number of COs.

It is important to determine the methods of assessment. A comprehensive assessment strategy may be outlined using the revised Bloom's Taxonomy levels.

BLOOM'S TAXONOMY

CO - PO Mapping of Courses

After framing the CO statements, the COs framed for each course is mapped with POs based on the relationship that exists between them. The COs which are not related to any of the POs is indicated with (-), signifying Nil. Measurement Mapping is based on Four Points Scale [High (H), Medium (M), Low (L) and Nil (-)]. For calculating weighted percentage of contribution of each Course in the attainment of the respective POs, the weights assigned for H, M and L are 3, 2 and 1 respectively.

CO-PO/PSO Mapping Table (Course Articulation Matrix)

PO/PSOs COs	PO1/ PSO1	PO2/ PSO2	PO3/ PSO3	PO4/ PSO4	PO5/ PSO5	PO6/ PSO6	PO7/ PSO7	PO8/ PSO8
CO1								
CO2								
CO3								
CO4								
CO5								

ELIGIBILITY FOR ADMISSION

The candidate should have passed in B.Sc. Home Science & Nutrition and Dietetics from any recognised University.

DURATION OF THE PROGRAMME

The candidates shall undergo the prescribed Programme of study for a period of two academic years (four semesters).

MEDIUM OF INSTRUCTION

English

B.2 EVALUATION SCHEME

Components	Internal Assessment Marks	External Examination Marks	Total Marks
Theory	25	75	100

B.2.1 Core Courses, Discipline Specific Elective Courses

INTERNAL ASSESSMENT**Distribution of Marks****Theory**

Mode of Evaluation	Marks
Internal Test	: 20
Assignment	: 5
Total	: 25

Three Periodic Tests - Average of the best two will be considered

Two Assignments - Better of the two will be considered

Practical

Mode of Evaluation	Marks
Internal Test	: 30
Record Performance	: 10
Total	: 40

Internal Test - Average of the best two will be considered

Performance - Attendance and Record

Question Pattern for Internal Test**Duration: 2 Hours**

Section	Q. No.	Types of Question	No. of Questions	No. of Questions to be answered	Marks for each Question	Total Marks
A	1 - 5	Fill in & Sentence Form	5	5	1	5
B	6-9	Internal Choice – Either... or Type	4	4	5	20
C	10 - 11	Internal Choice – Either.... or Type	2	2	10	20
Total						45*

*The total marks obtained in the Internal Test will be calculated for 20 marks

Summative Examination**External Assessment**

Distribution of Marks

Mode of Evaluation		Marks
Summative Examination	:	60
Seminar Presentation	:	15
Total	:	75

Summative Examination**Question Pattern****Duration: 3 Hours**

Section	Q. No.	Types of Question	No. of Questions	No. of Questions to be answered	Marks for each Question	Total Marks
A	1 - 5	Fill in & Sentence Form	5	5	1	5
B	6 - 10	Internal Choice - Either ...or Type	5	5	5	25
C	11 - 13	Internal Choice - Either ...or Type	3	3	10	30
Total						60

B.2.2 Extra Credit Courses

- Two credits are allotted for each Extra Credit Course offered by the Department.
- Extra credits are allotted for the completion of Open Online Courses offered by MOOC to the maximum of 15 credits.
- The Courses shall be completed within the first III Semesters of the Programme.

- The allotment of credits is as follows
 - 4weeks Course - 1 credit
 - 8 weeks Course - 2 credits
 - 12 weeks Course - 3 credits

ELIGIBILITY FOR THE DEGREE

- The candidate will not be eligible for the Degree without completing the prescribed Courses of study and a minimum of 50% Pass marks in all the Courses.
- No Pass minimum for Internal Assessment for other Courses.
- Pass minimum for External Examination is 27 marks out of 60 marks for Core Courses, Discipline Specific Elective Courses and Non-Major Elective Course.
- Pass minimum for Practice for SET/NET - General Paper is 50 Marks.
- Attendance
 - The students who have attended the classes for 76 days (85%) and above are permitted to appear for the Summative Examinations without any condition.
 - The students who have only 60-75 days (66% -84%) of attendance are permitted to appear for the Summative Examinations after paying the required fine amount and fulfilling other conditions according to the respective cases.
 - The students who have attended the classes for 59 days and less – upto 45 days (50% - 65%) can appear for the Summative Examinations only after getting special permission from the Principal.
 - The students who have attended the classes for 44 days or less (<50%) cannot appear for the Summative Examinations and have to repeat the whole semester.
- These rules are applicable to UG, PG and M.Phil. Programmes and come into effect from 2020-2021 onwards.
- For Certificate, Diploma, Advanced Diploma and Post Graduate Diploma Programmes, the students require 75% of attendance to appear for the Theory/Practical Examinations.

B.3 ASSESSMENT MANAGEMENT PLAN

An Assessment Management Plan that details the assessment strategy both at the Programme and the Course levels is prepared. The continuous assessment is implemented using an assessment rubric to interpret and grade students.

B.3.1 Assessment Process for CO Attainment

Assessment is one or more processes carried out by the institution that identify, collect and prepare data to evaluate the achievement of Course Outcomes and Programme Outcomes. Course Outcome is evaluated based on the performance of students in the Continuous Internal Assessments and in End Semester Examination of a course. Target levels of attainment shall be fixed by the Course teacher and Heads of the respective departments.

Direct Assessment (Rubric based) - Conventional assessment tools such as Term Test, Assignment, Quiz and End Semester Summative Examination are used.

Indirect Assessment - Done through Course Exit Survey.

CO Assessment Rubrics

For the evaluation and assessment of COs and POs, rubrics are used. Internal assessment contributes 40% and End Semester assessment contributes 60% to the total attainment of a CO for the theory courses. For the practical courses, internal assessment contributes 50% and Semester assessment contributes 50% to the total attainment of a CO. Once the Course Outcome is measured, the PO can be measured using a CO-PO matrix.

CO Attainment

Direct CO Attainment

Course Outcomes of all courses are assessed and the CO - wise marks obtained by all the students are recorded for all the assessment tools. The respective CO attainment level is evaluated based on set attainment rubrics.

Target Setting for Assessment Method

For setting up the target of internal assessment tools, 55% of the maximum mark is fixed as target. For setting up the target of End Semester Examination, the averagemark of the class shall be set as target.

Formula for Attainment for each CO

Attainment = Percentage of students who have scored more than the target marks

$$\text{Percentage of Attainment} = \frac{\text{Number of Students who Scored more than the Target}}{\text{Total Number of Students}} \times 100$$

Attainment Levels of COs

Assessment Methods	Attainment Levels	
Internal Assessment	Level 1	50% of students scoring more than set target marks in Internal Assessment tools
	Level 2	55% of students scoring more than set target marks in Internal Assessment tools
	Level 3	60% of students scoring more than set target marks in internal Assessment tools
End Semester Summative Examination	Level 1	50% of students scoring more than average marks in End Semester Summative Examination
	Level 2	55% of students scoring more than average marks in End Semester Summative Examination
	Level 3	60% of students scoring more than average marks in End Semester Summative Examination

Indirect CO Attainment

At the end of each Course, an exit survey is conducted to collect the opinion of the students on attainment of Course Outcomes. A questionnaire is designed to reflect the views of the students about the Course Outcomes.

Overall CO Attainment=75% of Direct CO Attainment + 25 % of Indirect CO Attainment

In each Course, the level of attainment of each CO is compared with the predefined targets. If the target is not reached, the Course teacher takes necessary steps for the improvement to reach the target.

For continuous improvement, if the target is reached, the Course teacher can set the target as a value greater than the CO attainment of the previous year.

B.3.2 Assessment Process for Overall PO Attainment

With the help of CO - PO mapping, the PO attainment is calculated. PO assessment is done by giving 75% weightage to direct assessment and 25% weightage to indirect assessment. Direct assessment is based on CO attainment, where 75% weightage is given to attainment through End Semester Examination and 25 % weightage is given to attainment through Internal assessments. Indirect assessment is done through Graduate Exit Survey and participation of students in Co-curricular/Extra-curricular activities.

PO Assessment Tools

Mode of Assessment	Assessment Tool	Description
Direct Attainment (Weightage -75%)	CO Assessment	This is computed from the calculated CO Attainment value for each Course.
Indirect Attainment (Weightage - 25%)	Graduate Exit Survey 10%	At the end of the Programme, Graduate Exit Survey is collected from the graduates and it gives the opinion of the graduates on attainment of Programme Outcomes.
	Co-curricular / Extra-curricular activities 15%	For participation in Co-curricular/Extra-curricular activities during the period of their study.

Programme Articulation Matrix (PAM)

Course Code	Course Title	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8
Average Direct PO Attainment									
Direct PO Attainment in percentage									

Indirect Attainment of POs for all Courses

POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8
Graduate Exit Survey								
Indirect PO Attainment								

Attainments of POs for all Courses

POs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8
Direct Attainment(Weightage - 75%)								
Indirect Attainment(Weightage - 25%)								
Overall PO Attainment								

**Overall PO Attainment= 75% of Direct PO Attainment +
25% of Indirect PO Attainment (Graduate Exit Survey
& Participation in Co- curricular and Extra-
curricular Activities)**

Expected Level of Attainment for each of the Programme Outcomes

POs	Level of Attainment
Attainment Value $\geq 70\%$	Excellent
$60\% \leq$ Attainment Value $< 70\%$	Very Good
$50\% \leq$ Attainment Value $< 60\%$	Good
$40\% \leq$ Attainment Value $< 50\%$	Satisfactory
Attainment Value $< 40\%$	Not Satisfactory

Level of PO Attainment

Graduation Batch	Overall PO Attainment(in percentage)	Whether Expected Level of PO is Achieved? (Yes/No)

B.3.3 Assessment Process for PEOs

The curriculum is designed so that all the courses contribute to the achievement of PEOs. The attainment of PEOs is measured after 3 years of completion of the Programme only through Indirect methods.

Target for PEO Attainment

Assessment Criteria	Target (UG)	Target (PG)
Record of Employment	15% of the class strength	30 % of the class strength
Progression to Higher Education	50% of the class strength	5 % of the class strength
Record of Entrepreneurship	2 % of the class strength	5 % of the class strength

Attainment of PEOs

Assessment Criteria & Tool	Weightage
Record of Employment	10
Progression to Higher Education	20
Record of Entrepreneurship	10
Feedback from Alumnae	30
Feedback from Parents	10
Feedback from Employers	20
Total Attainment	100

$$\text{Percentage of PEO Attainment from Employment} = \frac{\text{Number of Students who have got Employment}}{\text{Target}} \times 100$$

$$\text{Percentage of PEO Attainment from Higher Education} = \frac{\text{Number of Students who pursue Higher Education}}{\text{Target}} \times 100$$

$$\text{Percentage of PEO Attainment from Entrepreneurship} = \frac{\text{Number of Students who have become Entrepreneurs}}{\text{Target}} \times 100$$

Expected Level of Attainment for each of the Programme Educational Objectives

POs	Level of Attainment
Attainment Value $\geq 70\%$	Excellent
$60\% \leq \text{Attainment Value} < 70\%$	Very Good
$50\% \leq \text{Attainment Value} < 60\%$	Good
$40\% \leq \text{Attainment Value} < 50\%$	Satisfactory
Attainment Value $< 40\%$	Not Satisfactory

Level of PEO Attainment

Graduation Batch	Overall PEO Attainment (in percentage)	Whether Expected Level of PEO is Achieved? (Yes/No)

C. PROCESS OF REDEFINING THE PROGRAMME EDUCATIONAL**OBJECTIVES**

The college has always been involving the key stakeholders in collecting information and suggestions with regard to curriculum development and curriculum revision. Based on the information collected, the objectives of the Programme are defined, refined and are inscribed in the form of PEOs. The level of attainment of PEOs defined earlier will be analysed and will identify the need for redefining PEOs. Based on identified changes in terms of curriculum, regulations and PEOs, the administrative system like Board of Studies, Academic Council and Governing Body may recommend appropriate actions. As per the Outcome Based Education Framework implemented from the Academic Year 2020 - 2021, the following are the Programme Structure, the Programme Contents and the Course Contents of M.Sc. Home Science – Nutrition and Dietetics Programme.

V.V.VANNIAPERUMAL COLLEGE FOR WOMEN

Semester I	ADVANCED FOOD SCIENCE	Hours/Week: 6	
Core Course- 1		Credits: 5	
Course Code 23PHSC11		Internal 25	External 75

COURSE OUTCOMES

On successful completion of the course the student will be able to

CO1: explain the chemical structure and the properties of the main components in food.

[K2]

CO2: write the composition and types of food, food additives and food commodities. [K3]

CO3: find the cooking quality of foods and apply food science knowledge in food industries. [K3]

CO4: analyze the role of food and food additives in food industries. [K4]

CO5: examine the effect of cooking and processing on food components and food commodities and analyze the proper use of food colors and food additives in safe food preparation.[K4]

UNIT I

Properties of food- Food nutrients, solids, solutions and colloids, Solutions-

Physical properties of solutions, classification of foods based on viscosity characteristics. Solutes-chemical properties, Food dispersion: Colloids- Types of colloid and properties of colloids and rheology of food dispersions; Structure, formation and stability of gels, sols, emulsion and foams.

Starch - Sources, Structure and composition of starch; Properties and characteristics of food starches; Modified food starches-Structure and composition, Effect of heat on food starch properties, gluten formation in wheat flour, influencing factors[gluten], gelatinization, gelation and retrogradation, dextrinization and factors affecting gelatinization. (18 Hours)

UNIT II

Proteins-Structure and composition, Classification and properties of proteins; Effect of heat on physio-chemical properties of proteins; Role of proteins in food products; Texturized vegetable protein, protein concentrates.

Enzymes: Classification and its nature; Mechanism of action; Factors influencing enzyme activity; Role of enzymes in food products; Immobilized enzymes and its application in food industries. (18 Hours)

UNIT III

Fats and oil -Structure, composition and properties of fats and oil; storage of fat, characteristics [shortening, plasticity, flavor, retention of moisture, melting point, optical activity, color, specific gravity], Hydrogenation, winterization, flavor reversion, smoking point, Rancidity-Types, Mechanism and prevention; Role of fat/oil in food products; Fat substitutes.

Sugar and sugar products-Types of sugar, Types of granulated sugar, Physical and chemical properties, Sugar products -Types of honey, Jaggery, corn syrup, various forms of sugar used in cookery and Crystallization of sugar. (18 Hours)

UNIT IV

Milk components- water, carbohydrate, milk fat, milk protein, minerals and other components in milk, Physiochemical properties of milk, Effect of physical and chemical factors on milk components [Effect of heat, protein, factors affecting coagulation, casein coagulation, minerals, Non-enzymatic browning], [Effects of acid], Effects of enzymes- renin, fermented and non-fermented milk products

Egg-proteins in Egg, microscopic structure of egg, characteristics [color, size], Nutritional qualities, quality check, functional properties- foaming, factors affecting foam formation. (18 Hours)

UNIT V

Food additives- Definition, different food additives and Need for food additives. Flavour compounds in vegetables, fruits and spices; Effect of processing on food flavours; Role of colours and flavours in food products.

Sweeteners- Properties, Artificial and Natural sweeteners and role of sweeteners in food industry. (18 Hours)

Re-accredited with 'A' Grade (3rd Cycle) by NAAC

VIRUDHUNAGAR - 626 001

M.Sc. Home Science – Nutrition and Dietetics (2023-2024 onwards)

Semester I	ADVANCED HUMAN PHYSIOLOGY	Hours/Week: 6	
Core Course- 2		Credits: 5	
Course Code 23PHSC12		Internal 25	External 75

COURSE OUTCOMES

On successful completion of the course the student will be able to-

CO1: describe the structure and parts of the cell, glands, vital organs and systems in the human body. [K2]

CO2: identify the functions of cell, glands, vital organs and systems in human body. [K3]

CO3: determine the physiological mechanism, process and formation of various secretions in human organs and systems. [K3]

CO4: classify the types of various physiological systems in human body. [K4]

CO5: analyse the abnormalities found in various organs and systems in the human body by assessing the composition and secretions of various glands. [K4]

UNIT I

Cell - Structure and Function - Transportation across cell membrane - Cell theory and Cycle
- Difference between Meiotic and Mitotic cell - Stem cells- types and functions

Tissue - Structure and Function. (18 Hours)

UNIT II

Blood - Composition & Functions - Blood Group – ABO System & Rh factor - Blood Coagulation.

Heart - Structure & Function of Heart and Blood Vessels - Systemic & Pulmonary circulation - Cardiac cycle and Conduction - Heart rate and Cardiac output - ECG - Blood pressure & their regulations. (18 Hours)

UNIT III

Respiratory System - Structure and function - Gas Laws pertaining to Gas Exchange (Meaning only)-Henry's Law of Partial Pressure, Boyle - Mariotte's Law of Volume and Pressure, Dalton's Law of Partial Pressure, Charles's Law of Ideal Gas Equation and Fick's Law of Diffusion - Mechanism of respiration - Circulation and Exchange of respiratory gases. Internal and External Respiration - Chloride shift - Definitions of Lung volumes and Lung capacities - Ventilation and Artificial Respiration.

Immunity - Definition and types Innate and Acquire immunity.

Endocrine System - Hormones and its type - Syndromes resulting from hypo and hyperactivity of Pituitary, Thyroid, Adrenals and Pancreas. (18 Hours)

UNIT IV

Gastrointestinal System - Structure and function of GI tract and its accessory organs - Digestion and absorption of Carbohydrates, Proteins and Fats.

Reproductive System - Role of hormones in reproduction and Lactation - Menstrual Cycle and Menopause - Invitro (I V) fertilization - Spermatogenesis. (18 Hours)

UNIT V

NERVOUS SYSTEM - Structure and Function of Neuron. Afferent and Efferent Nerves - Conduction of Nerve Impulse- Synapses, Neurotransmitters, Summation and Action Potential - Sympathetic and Parasympathetic nervous System - Cerebrospinal fluid (CSF) – composition and function - Blood-brain barrier (BBB) - Electroencephalogram (EEG)

EXCRETORY SYSTEMS

Renal system - Organs in the Urinary System - Structure and functions of Nephron - Juxtaglomerular Cell - Mechanism of formation of urine - Role of kidney to regulate Blood pressure, Water, Electrolytes and Acid Base Balance.

Skin - Structure and function - Regulation of temperature of the body. (18 Hours)

VIRUDHUNAGAR - 626 001

M.Sc. Home Science – Nutrition and Dietetics (2023-2024 onwards)

Semester I	MACRONUTRIENTS	Hours/Week: 6	
Core Course- 3		Credits: 5	
Course Code 23PHSC13		Internal 25	External 75

COURSE OUTCOMES

On successful completion of the course the student will be able to

CO1: state the concept, sources, types and essentials of major nutrients in growth and development of human. [K2]

CO2: find the mechanisms behind the metabolic regulations for the proper functioning of human body.[K3]

CO3: identify the role of protein, fat, carbohydrate, water and energy in maintaining human health. [K3]

CO4: analyse the factors affecting BMR, body fluid and consequences of nutrient deficiency diseases. [K4]

CO5: examine the total energy and water requirements, protein quality, glycemic index of foods and the methods to meet dietary recommendations of the community. [K4]

UNIT I

Energy- Energy content of foods, physiological fuel value, Estimation of total energy requirements (BMR, REE and physical cost of activities) TEE, Energy balance, Basal metabolic rate, total energy requirements, BMR& RMR, Factors affecting BMR, Thermic effect of food. Changes in body weight and body composition with the changing energy balance, Regulation of food intake- role of hunger and satiety centres. Energy balance and obesity. (18 Hours)

UNIT II

Carbohydrates – Classification, sources, functions, review of carbohydrate metabolism, Therapeutic uses of carbohydrates, sugars in parenteral nutrition. Glycemic index of foods and its uses. Toxic effects of fructose, xylitol and galactose. Sugar alternatives, Role of dietary fiber in health and disease. Role of carbohydrates in health and disease (18 Hours)

UNIT III

PROTEIN – Classification, sources, functions, Historical review of protein metabolism, Amino acid patterns in protein & of animals and vegetable origin, critical study of methods of assessment of protein quality. Physiological functions of proteins. Essential Amino Acids, amino acid balance and imbalance, Role of protein in health and disease. Supplementation of individual amino acid. (18 Hours)

UNIT IV

Lipids – Concepts of visible and invisible fats, EFA, SFA, MUFA, PUFA, omega-6 to omega-3 ratios. – sources and physiological functions and their role in health and disease. Adipose tissue – Lipogenesis and Lipolysis, lipoproteins – types and health implication. Storage of body fat, Effects of deficiency. Fat substitutes, Hypocholesterolaemic foods – garlic, fiber and plant proteins. (18 Hours)

UNIT V

Water – Sources, Function, Requirement, Distribution of water in the body and Factors influencing distribution of body fluid. Exchange of water in the body. Water imbalance – dehydration- water intoxication, water and electrolyte mechanism – ADH. (18 Hours)

M.Sc. Home Science – Nutrition and Dietetics (2023-2024 onwards)

Semester I	ADVANCED FOOD SCIENCE PRACTICAL	Hours/Week: 6	
Core Practical - 1		Credits: 3	
Course Code 23PHSC11P		Internal 40	External 60

COURSE OUTCOMES

On successful completion of the course the student will be able to

CO1: write the procedure for analysing the food samples. [K2]

CO2: trace the structure of starches and physical properties of food samples. [K2]

CO3: find the cooking quality of foods and apply the knowledge and skills in food industries.[K3]

CO4: identify the factors affecting the cooking quality of different foods.[K3]

CO5: examine the appropriate food preparation and processing methods to ensure the food quality standards[K4]

UNIT I

Sensory method –Analysis of taste sensitivity-Threshold test Duo –Trio test

Multiple sample difference

Starch Microscopic structure and gelatinization. Factors affecting gelatinization –sag test.

Gluten formation

UNIT II

PULSE

Factors affecting cooking quality

FRUIT

Enzymatic browning Pectin test

Firmness of gel

UNIT III

VEGETABLE

Various method of cooking fat soluble and water-soluble pigment.

MILK

Detecting the presence of starch, soda, starch, urea in milk sample. pH of milk sample.

Effect of acid on milk Maillard reaction.

UNIT IV

SUGAR

Relative sweetness of sugar- sucrose, maltose, lactose, fructose, dextrose, glucose, artificial sweeteners Stages of sugar cookery.Effect of dextrose, jaggery, honey and cream of tartar on sucrose.

FATS AND OIL

Smoking point – Groundnut oil, coconut oil, Gingelly oil, Olive oil, Vanaspati, Ghee, Refined Sunflower oil, Rice bran oil. Cooking temperature and fat absorption- – Groundnut oil, coconut oil, Gingelly oil, Refined Sunflower oil, Rice bran oil.

UNIT V

PHYSICAL PROPERTIES

Thousand grain weight

Thousand grain volume

Hydration capacity

Hydration index

Swelling capacity

Specific gravity

Seed displacement test

Viscosity - Line spread test, Viscometer.

Adulteration

Semester I	FOOD PROCESSING AND TECHNOLOGY	Hours/Week: 6	
DSEC – 1		Credits: 4	
Course Code 23PHSE11		Internal 25	External 75

COURSE OUTCOMES

On successful completion of the course the student will be able to

CO1: describe the concept, scope, importance and principles of food processing and discuss the classification and nutritive value of various food commodities. [K2]

CO2: find the physiochemical properties, selection, storage and preservation of various foods [K3]

CO3: identify the different methods and steps involved in processing of various foods. [K3]

CO4: analyse the changes that occur during processing of different foods and the factors influencing it. [K4]

CO5: focus on the various processed food products and by-products from food processing. [K4]

UNIT I

Processing of foods: Primary, secondary and tertiary processing, historical perspective, traditional technologies used in food processing. Effects of processing on components, properties and nutritional value of foods.

Enzymes in Food Processing: Enzyme- Review of classification, enzyme inhibitors, enzymatic browning. (18 Hours)

UNIT II

Cereal Processing and Technology:

Rice: parboiling, milling and pearling; Processing and milling of wheat, maize, barley, oats and rye. Millets: processing of millets; Cereal Products: Flours and its quality; Processed products of rice, wheat and maize; By products utilization; breakfast cereals and extrusion; Effect of processing on nutritive value of cereals; changes in physiochemical properties of cereal starch

and protein due to processing. Milling process: Complete milling process, break rolls, reduction rolls, milled products and their nutritive value and applications

Pulse Processing and Technology:

Dals, flours, protein concentrates, isolates and hydrolysates; By products utilization; Effect of processing on nutritive value and physiochemical properties of pulses.

Nuts and Oil Seeds Processing and Technology:

Nuts Processing methods, Oil seeds processing: Oil extraction methods and refining process; byproducts utilization; Effect of processing on nutritive value and physiochemical properties of vegetable oils. (18 Hours)

UNIT III

Vegetables Processing and Technology:

Pigments: Classification, effects on processing of vegetables; Preliminary processing of vegetables; Vegetable products: Fermented and non-fermented and its shelf life; Vegetable waste utilization; Effect of processing on nutritive value and physiochemical properties of vegetable

Fruits Processing and Technology:

Concept of maturity, ripening and senescence; Methods of fruit processing technologies: traditional and new methods.

Fruit products: fermented and non fermented; Effect of processing on nutritive value and physiochemical properties of fruits;

Browning reactions: types and mechanism; prevention methods; Fruit waste utilization.

Milk Processing and Technology:

Milk types, composition, physiochemical properties; Milk processing- Separation, centrifugal process, natural creaming, pasteurization, sterilization, homogenization. Milk storage; Effects of processing on nutritive value and physicochemical properties of milk (18 Hours)

UNIT IV

Egg Processing and Technology:

Egg processing and storage; Effect of processing on nutritive value and physiochemical properties of eggs; changes in egg quality during storage and preservation methods.

Meat Processing and Technology:

Meat processing and storage; Factors influencing meat quality; Ageing and tenderization of meat.

Poultry: Processing and storage of poultry meat; Preservation methods for poultry.

Fish: Processing and storage; Preservation methods for fish. Effect of processing on nutritive value and physiochemical properties of meat, poultry and fish. (18 Hours)

UNIT V**Introduction of post-harvest technology**

Introduction to post-harvest technology of agricultural produce; Status of Production, Losses, Need, Scope and Importance.

Post-Harvest Loss- Definition, Factors contributing to Post-harvest Loss; and Technologies and Practices to reduce Post-harvest Losses. (18 Hours)

Semester I	INSTRUMENTATION IN FOOD ANALYSIS	Hours/Week: 6	
DSEC – 1		Credits: 4	
Course Code 23PHSE12		Internal 25	External 75

COURSE OUTCOMES

On completion of the course, students will be able to

CO1: explain the concept and need of various instruments used in food and nutrition field. [K2]

CO2: identify the working principle of various instruments used in food sectors. [K3]

CO3: illustrate the instrumentation and working mechanism of instruments used in food analysis.
[K3]

CO4: categorize the instrumental techniques based on their applications in analysis of macro and micro food components. [K4]

CO5: focus on the appropriate analytical instrument to measure, identify, separate and purify the unknown minor and major components in foods. [K4]

UNIT I

Instrumentation - introduction, need for food analysis and instrumentation, criteria for selecting technique. Principles and applications - densimetry, coulometry, balance - analytical balance, double pan analytical balance, single pan analytical balance, physical balance and methods of weighing. (18 Hours)

UNIT II

Principle and applications - pH and pH meter, colorimeter, bomb calorimeter, spectrophotometer, fluorimeter, refractometer and centrifugation - types. (18 Hours)

UNIT III

Principle and applications - chromatography – classification - paper chromatography, thin layer chromatography, column chromatography, gas chromatography, liquid chromatography and high-performance liquid chromatography. (18 Hours)

UNIT IV

Microscopy - basic principles and applications, types - Light, Compound, Phase contrast , Dark Field, Fluorescence Microscopy Scanning Electron Microscopy (SEM)-Transmission Electron Microscopy(TEM). (18 Hours)

UNIT V

Electrophoretic Techniques: General principles. Paper and Gel Electrophoresis. Polyacrylamide Gel Electrophoresis, SDS. (18 Hours)

DSEC – 1		Credits: 4	
Course Code 23PHSE13		Internal 25	External 75

COURSE OUTCOMES

On completion of the course students will be able to

- CO1: explain the concept of biotechnology, single cell protein, fermentation technology and genetically modified foods. [K2]
- CO2: apply the biotechnology techniques to produce SCP, enzymes, GMO and recovery process of the commercial products. [K3]
- CO3: determine the applications of biotechnology in food processing, mushroom production, industries GMO and fermentation process. [K3]
- CO4: analyze the role of biotechnology in food processing sectors and regulations to ensure the safety of biotechnology products.[K4]
- CO5: examine the pros and cons of food biotechnology on public health and food safety. [K4]

UNIT I

Biotechnology - definition, scope, potential benefits and risks of modern food biotechnology.

Role of biotechnology in food processing. (18 Hours)

UNIT II

Single Cell Protein (SCP) – definition, properties, nutritional value and advantages. Production process of spirulina, baker's yeast and mushroom- paddy straw mushroom, button mushroom and oyster mushroom. Preservation of mushrooms, identification of poisonous mushroom, safety and nutritional evaluation of SCP, economic importance of SCP. (18 Hours)

UNIT III

Fermentation Technology- introduction, types of fermentation process, steps involved in fermentation process. Fermenter (Bioreactor)-types- stirred tank fermenter and air lift fermenter.

Downstream Processing- stages in downstream processing-solid liquid separation, release of intracellular products, concentration, purification and formulation. (18 Hours)

UNIT IV

Processing of fermented products – organic acids- citric acid, lactic acid and acetic acid. Vitamins- vitamin B₁₂, vitamin B₂ and beta carotene. Amino acids - lysine and glutamic acid. Polysaccharides - xanthan, dextran and alginate.

Enzyme Technology – enzyme production - amylase, protease, pectinase, phosphatase and lipase. Applications of enzymes in food industry. (18 Hours)

UNIT V

Genetically Modified Foods - production, benefits and risks, safety issues of GM foods.

Regulations in biotechnology- biosafety -RDAC, IBSC, RCGM and GEAC.

Intellectual Property Rights (IPR). (18 Hours)

Re-accredited with 'A' Grade (3rd Cycle) by NAAC

VIRUDHUNAGAR - 626 001

M.Sc. Home Science – Nutrition and Dietetics (2023-2024 onwards)

Semester II	MICRONUTRIENTS AND DIETETICS	Hours/Week: 6	
Core Course - 4		Credits: 5	
Course Code 23PHSC21		Internal 25	External 75

COURSE OUTCOMES

On completion of the course, the students will be able to

CO1: review the basic concepts of nutrition science, micronutrients and overview of normal and special diet. [K2]

CO2: identify the role of micronutrients in human life cycle and special conditions. [K3]

CO3: find out consequences of micronutrients deficiencies and physical changes occur during different stages of human life cycle and in special conditions. [K3]

CO4: analyse the requirements of micronutrients needed during different stages of lifecycle and in special conditions. [K4]

CO5: correlate the relation between different micronutrients and plan the suitable menu and dietary modifications required for normal, special conditions persons and for sports persons. [K4]

UNIT I

Nutrition Science - Basic concepts - nutritional requirements - definition of concepts in relation to human nutritional requirements- basic terminology in relation to nutritional requirements - methods for studying the nutrient requirements. National and International recommendations on nutrient requirements - goals of National and International requirement estimates and RDA's dietary guidelines.

Minerals- Distribution in the body; functions, effects of deficiency, food sources, requirement, toxicity and recent research of macro minerals - Calcium, Phosphorous, Magnesium, Potassium, Sodium and Chloride.

Micro minerals – iron, zinc, fluoride, copper, iodine and manganese. Trace Minerals - Selenium, cobalt, chromium, silicon, boron and nickel. Selenium and Vitamin E relationship, Chromium and glucose tolerance factor. (18 Hours)

UNIT – II

Vitamins - Distribution in the body, functions, food sources, requirement deficiency, toxicity and recent research of Fat Soluble Vitamins A, D, E and K. Water soluble vitamins: vitamin C, thiamine, riboflavin, niacin, pantothenic acid, biotin, folic acid, vitamin B12, vitamin B 6, choline and inositol. (18 Hours)

UNIT III

Pregnancy - Physiological changes during pregnancy, nutritional needs during pregnancy, nutritional assessment and guidance in prenatal care. Nutritional problems and complications occur during pregnancy

Lactation - Physiology of lactation, human milk composition and infant growth and development, malnutrition - effects on milk and effects on mothers, maternal nutrition during lactation.

Infants and Preschool Children - growth and development, nutrient needs and recommended dietary (18 Hours)

UNIT IV

Older Children and Adolescents - changes in physical development and body composition, sexual maturity, psycho-social change, nutrient needs and recommended dietary intakes, diet and dietary patterns. Nutritional problems of school going children and adolescents.

Adult- Nutritional recommendations, food requirements, low cost balanced diet and dietary guidelines (18 Hours)

UNIT V

Old Age - nutrition and ageing, physiological changes associated with ageing, nutritional requirements and dietary modifications, guidelines for planning balanced diets for elderly.

Sports Nutrition - energy systems, nutritional requirements, sports anemia, water and electrolytes, pre-event meals, weight and body composition of athletes, nutritional supplements and dietary guidelines.

An Overview of Special Diets – purine restricted diet, ketogenic diet, paleo diet and diet in cleft lip or palate. (18 Hours)

VIRUDHUNAGAR - 626 001

M.Sc. HOME SCIENCE - NUTRITION AND DIETETICS

(2023 - 2024 onwards)

Semester II	CLINICAL BIOCHEMISTRY	Hours/Week: 6	
Core Course -5		Credits: 5	
Course Code 23PHSC22		Internal 25	External 75

COURSE OUTCOMES

On completion of the course, the students will be able to

CO1: outline the basic concept of macronutrients, functions of liver and kidney in human body.

[K2]

CO2: write the biosynthesis and metabolic pathway of macronutrients.[K3]

CO3: determine the role of macronutrients, enzymes and major organs in clinical diagnosis.[K3]

CO4: analyse the metabolic disorders associated with carbohydrates, protein, fat and nucleic acids.[K4]

CO5: analyse the clinical procedure involved in the diagnosis of various disorders.[K4]

UNIT I

Carbohydrate Metabolism- Glycolysis, TCA cycle, HMP shunt, glycogenesis, glycogenolysis, gluconeogenesis. Regulation of Glycolysis and glycogen metabolism- regulation of blood glucose level. Glucose Tolerance Test, Galactose Tolerance Test

Metabolic disorders- glycosuria, galactosemia, lactose intolerance and glycogen storage diseases. (18 Hours)

UNIT II

Protein Metabolism – Transamination reaction, deamination reaction and urea cycle. Biosynthesis of nonessential amino acids, synthesis of specialized products from amino acids.

Metabolic disorders- Alkaptonuria, Phenyl ketonuria, Tyrosinemia, Albinism and Maple syrup urine disease

Enzymes - Mechanism of enzyme action, factors affecting enzyme activity, role of enzymes in metabolism, enzymes and coenzymes in clinical diagnosis. (18 Hours)

UNIT III

Lipid Metabolism – Lipogenesis, synthesis of fatty acids, oxidation of fatty acids, ketogenesis, biosynthesis of cholesterol, catabolism of cholesterol.

Metabolic disorders - Ketosis, Gaucher's disease, Tay-Sach's disease and Niemann Pick disease. (18 Hours)

UNIT IV

Nucleotide Metabolism - Purine Nucleotide synthesis - De Novo synthesis and Salvage pathway. Pyrimidine synthesis - deoxyribonucleotide synthesis.

Metabolic disorders - Gout and Lesch -Nyhan syndrome. (18 Hours)

UNIT V

Liver and Renal Function Tests - functions of liver - estimation of plasma fibrinogen - flocculation tests, hippuric tests, BSP retention test and Rose bengal dye test.

Functions of kidney - Glomerular filtration tests - urea clearance, creatinine clearance and inulin clearance test- concentration test, water dilution/ elimination test and phenol sulphthalein excretion test. (18 Hours)

VIRUDHUNAGAR - 626 001

M.Sc. HOME SCIENCE – NUTRITION AND DIETETICS

(2023 - 2024 onwards)

Semester: II	RESEARCH METHODOLOGY	Hours/Week : 6	
Core Course - 6		Credits : 5	
Course Code 23PHSC23		Internal 25	External 75

COURSE OUTCOMES

On completion of the course, the students will be able to

CO1: explain the concept of good research, sampling, collection of data, reliability, validity and report writing. [K2]

CO2: apply the correct procedure to construct research design, select sampling methods, collect data, frame hypothesis and measure the quality of research to provide good report. [K3]

CO3: manipulate the data of the research process and present the results in a scientific manner to solve the research problems. [K3]

CO4: categorize research, hypothesis, variables, and collection of data, reliability, validity and report to pursue the research. [K4]

CO5: examine the research report of a contemporary problem and conclude the data by adopting software and research ethics. [K4]

UNIT I

Research- definition, objectives, importance, criteria of good research, types of research – historical, descriptive, experimental, Applied, case study and social research, definition and identification of a research problem.

Research design – meaning, need, features of good design – Experimental design - basic principles, informal experimental design and formal experimental designs. (18 Hours)

UNIT II

Variables – definition and types.

Hypothesis - definition, characteristics and types

Theory of probability – Sampling - definition, advantages and disadvantages, types- probability sampling - simple random sampling, restricted random sampling, systematic random sampling, stratified random sampling and multistage sampling, Non probability sampling-judgment, convenience and quota sampling. (18 Hours)

UNIT III

Collection of data-definition, sources of data, methods of collection – questionnaire, interview, observation, case study. Participatory Rural Appraisal (PRA) and Rapid Rural Appraisal (RRA). (18 Hours)

UNIT IV

Reliability – Meaning, definition, theory of reliability, types of reliability – inter-rater reliability, test-retest reliability, parallel forms reliability and internal consistency reliability. Factors affecting reliability

Validity – meaning, definition, approaches and types – faces and content validity, criterion related validity – convergent, discriminant, concurrent and predictive validity. Measurement of validation. (18Hours)

UNIT V

Report writing - definition, characteristics of good report, types of report, format of a good report and chapterisation, references, figures, formatting and typing of research report. Citation Software – Mendeley, Research ethics-objectives, principle, ethical practices in research, Plagiarism – meaning and importance. (18 Hours)

M.Sc. HOME SCIENCE - NUTRITION AND DIETETICS

(2023 - 2024 onwards)

Semester II	CLINICAL NUTRITION AND DIETETICS PRACTICAL	Hours/Week: 6	
Core Course Practical -2		Credits: 3	
Course Code 23PHSC21P		Internal 40	External 60

COURSE OUTCOMES

On completion of the course, students will be able to

CO1: describe the procedure for qualitative and quantitative analysis of biochemical constituents in urine and blood. [K2]

CO2: write the principles of diet in planning a suitable balanced diet for the different age groups. [K2]

CO3: estimate the amount of biochemical constituents present in blood, prepare the meal, calculate the nutrients present in the prepared meal and document the record. [K3]

CO4: use the results and write the interpretations. [K3]

CO5: analyse the situation and plan the menu suitable for different stages of life and for various clinical conditions. [K4]

Biochemical Analysis in Urine and Blood

- Methods of collecting urine and blood samples.
- Separation of serum and plasma.
- Qualitative analysis of sugar in urine sample.
- Qualitative analysis of urea, creatinine, bilirubin and bile pigments in urine sample.
- Quantitative estimation of blood for glucose.
- Quantitative estimation of blood cholesterol.
- Quantitative estimation of urea, creatinine and protein in blood.

Dietetics Practical

- Planning, preparation and calculation of nutrient content of meals for high, middle and low income families and diet for an adult man and woman doing different physical activities - sedentary, moderate and heavy.
- Planning, preparation and calculation of nutrient content of a balanced diet for a pregnant and lactating woman with modification of normal meal pattern including special foods given during lactation.
- Preparation of supplementary foods, planning, preparation and calculation of nutrient content of diet for a pre - school child.
- Planning, preparation and calculation of nutrient content of meals/ packed lunch for school children.
- Planning, preparation and calculation of nutrient content of meals for adolescent boys and girls.
- Planning, preparation and calculation of nutrient content of diet for elderly considering their special needs.
- Planning, preparation and calculation of nutrient content of diet for athletes.

Visit to Clinical and Dietetics Lab

VIRUDHUNAGAR - 626 001

M.Sc. HOME SCIENCE – NUTRITION AND DIETETICS

(2023 - 2024 onwards)

Semester: II	COMPOSITE HOME SCIENCE	Hours/Week:6	
DSEC - 2		Credits: 4	
Course Code - 23PHSE21		Internal 25	External 75

COURSE OUTCOMES

On completion of the course, the students will be able to

- CO1: explain the concepts of Food Science, Nutrition, Dietetics and Institutional management, Textiles and Clothing, Family Resource Management, Human development and Extension Education. [K2]
- CO2: identify the role of nutrition in health and fibre in fabric manufacturing, resources in home management, peers, family, school, community and culture on child development and teaching aids in community development. [K3]
- CO3: apply the scientific principles of various aspects in branches of Home Science in their day today life. [K3]
- CO4: focus the scientific skills in the management of resources and develop basic skills for career options in the fields of dietetics, interior designing, textiles and clothing and extension education. [K4]
- CO5: analyse the various aspects in the branches of Home Science for healthy human upliftment and community.[K4]

UNIT I

Food, Nutrition, Dietetics and Institutional Management

Food - food groups, balanced diet and food pyramid. Food - Quality evaluation of foods – objective and subjective perspectives. Effects of cooking and processing techniques on nutritional components. Nutrients - role of nutrients, deficiencies and

requirements of nutrients for Indians. Nutrition through life span-nutritional needs and dietary guidelines for adequate nutrition.

Food service management at institutional level-hospital, educational, social and special institutions. (18 hours)

UNIT II

Textiles and Clothing

Fibre - Classification and Properties, Manufacturing process of major natural fibres – cotton, silk and wool and manmade fibres – rayon, nylon and polyester. Identification of fibres. Classification of yarns and Types of weaves. Methods of fabric construction: Woven, Knitted and non-woven fabrics - Its properties and uses. Finishes Classification, processing and purposes.

Dyeing and printing - Classification, Method of block printing, tie and dye, batik, roller printing, screen printing, discharge, heat transfer printing and digitized printing. Traditional textiles of India. Testing of colour - Fastness, shrinkage, pilling and GSM of fabrics. Wardrobe planning for different age group (18 Hours)

UNIT III

Family Resource Management

Management - Concept, Management of time, energy, money and space. Resources - classification, characteristics and factors affecting resources. Time management, Energy management, work simplification techniques, classes of change and fatigue. Money Management - Family income, types, budgeting, household accounts, family savings and investment. Consumer - Definition, role, rights and responsibilities, consumer behaviour, consumer problems and consumer education.

Design Fundamentals: Elements and principles of design. Colour - Dimensions of colour and colour schemes. Space planning and design-housing - Need, principles of planning spaces, types of house planning for different income groups. (18 Hours)

UNIT IV

Human Development

Principles of growth and development, prenatal care, prenatal development and various domains of growth and development from infancy to old age.

Theories of human development – Freud’s Theory, Erikson’s Theory, Piaget Theory, Kohlberg’s Theory and Pavlov’s Theory. role of peers, family, school, community and culture and personality development on children. childlabour, child abuse and trafficking. Developmental Task of various stages of life span. (18 Hours)

UNIT V

Extension Education

Extension Education – meaning, history, objectives, principles and Philosophy. Communication - definition, elements, models, types and barriers of communication. Different approaches of extension education. Audio-visual aids- classification, preparation and selection criteria. Extension programme Planning – meaning, need, developmental process. Community development programme and Three tier systems of panchayat raj. National programmes related to rural development. (18 Hours)

V.V.VANNIAPERUMAL COLLEGE FOR WOMEN

(Belonging to Virudhunagar Hindu Nadars)

An Autonomous Institution Affiliated to Madurai Kamaraj University, Madurai

Re-accredited with 'A' Grade (3rd Cycle) by NAAC

VIRUDHUNAGAR - 626 001

M.Sc. HOME SCIENCE - NUTRITION AND DIETETICS

(2023 - 2024 onwards)

Semester II	PUBLIC NUTRITION	Hours/Week: 6	
DSEC -2		Credits: 4	
Course Code		Internal	External
23PHSE22		25	75

COURSE OUTCOMES

On completion of the course, students will be able to

CO1: outline the definition, need, scope, objectives and importance of public nutrition, malnutrition, food and nutrition security, nutritional assessment, nutrition education, intervention programmes and national and international organizations.

[K2]

CO2: identify the factors influencing community nutrition and macro and micro nutrients problems, principles of food and nutrition security, nutritional assessment, theory of nutrition education and functions of national and international organizations.[K3]

CO3: find the types of PEM, health, and methods of assessing nutritional status, Nutrition education, intervention programmes, preventive measures of PEM and examine the interrelationship of food and nutrition security and the role of national and international organizations in improving the community health. [K3]

CO4: analyse the consequences of macro and micro nutrient problems, strategies to combat public nutrition, food security, activities of national and international programmes and the process of nutrition education and communication. [K4]

CO5: focus the suitable strategies to overcome the nutritional problems in the community. [K4]

UNIT I

Public Nutrition- definition, factors influencing community nutrition and health.

Malnutrition - PEM – causes, consequences and preventive measures.

Food and Nutrition Security- meaning, determinants, assessment of food security, principles of food and nutrition security and its interrelationship (18 Hours)

UNIT II

Major Nutritional Problems and Intervention Programmes – macro and micro nutrient deficiency diseases - etiology, prevalence, clinical manifestation, preventive and therapeutic measures. Intervention programmes - National Nutritional Anaemia Control Programme, Vitamin A Prophylaxis Programme, Iodine Deficiency Disorders Programme, Policy on use of Zinc in the National Programme for Management of Diarrhoea, Mid-Day Meal Programme, ICDS. (18 Hours)

UNIT III

Nutritional Assessment - objectives, methods - clinical examination, anthropometric measurement, biochemical evaluation and dietary assessment.

Strategies to Combat Public Nutrition Problems – Diet based strategies, Immunization, Supplementary feeding programmes. (18 Hours)

UNIT IV

National Organizations - ICMR, NIN, CFTRI, NIPCCD

International Organizations - FAO, WHO, UNICEF, UNESCO, World Bank. (18 Hours)

UNIT V

Nutrition Education – definition, need, scope , importance, theory and methods of Nutrition Education, Process of Nutrition education and Communication. (18 Hours)

M.Sc. HOME SCIENCE – NUTRITION AND DIETETICS

(2023 - 2024 onwards)

Semester II	NUTRITION IN EMERGENCIES AND DISASTERS	Hours/Week:6	
DSEC -2		Credits: 4	
Course Code 23PHSE23		Internal 25	External 75

COURSE OUTCOMES

On completion of the course, the students will be able to

CO1: explain the concept of various natural and manmade emergencies, nutritional relief, rehabilitation and health care and methods of assessing the nutritional status of the victims.[K2]

CO2: identify the method of assessing the nutritional and health status of emergency and disaster affected population.[K3]

CO3: apply the nutritional relief and rehabilitation of the victims of emergencies and disasters and principles of health care to tackle the nutritional and health problems.[K3]

CO4: analyse the causes for nutritional and communicable diseases, clinical sign for screening acute malnutrition, survey of diseases and approach it to tackle nutritional and health problems in emergencies. [K4]

CO5: examine the process involved in disease investigation, reporting and control measures during various emergencies and disasters conditions.[K4]

UNIT I

Emergencies and Disaster Management – concept, disaster cycle – Natural and Manmade disasters resulting in emergency situation - famine, drought, flood, earthquake, cyclone, war, civil and political emergencies. Factors contributing to the rise and development of emergency situations.

Nutritional Problems and Communicable Diseases - Causes, major deficiencies and communicable diseases in emergencies - PEM and other specific deficiencies, cholera, typhoid, measles, TB, plague, chikungunya, dengue and Corona. Control and prevention, role of immunization and sanitation.

Nutritional Management of target group in disaster and emergencies situation – packet food and common kitchen in during and post disaster period. (18 Hours)

UNIT II

Assessment of nutritional status in emergency affected populations - Scope of assessment of malnutrition in emergencies, Indicators of malnutrition, clinical signs for screening acute malnutrition. Organization of nutritional surveillance and individual screening. (18 Hours)

UNIT III

Host Defense Mechanisms, types of immunization, Hazards of immunization, Cold Chain and Cold life, Universal and National Immunization Schedules. Screening and Survey of a Disease, Disease Investigation and Reporting. Disease monitoring and Surveillance. Emergence of new diseases, Prevention and control. (18 Hours)

UNIT IV

Nutritional Relief and Rehabilitation - Assessment of food needs in emergency situation, food distribution strategy – identifying and reaching the vulnerable group - Targeting Food Aid, mass and supplementary feeding, special foods and rations for nutritional relief.

Organizations for mass feeding, food distribution, transportation storage and feeding centers. Assessment process for nutritional rehabilitation at post disaster period. (18 Hours)

UNIT V

Health Care of the community – concept and levels of health care. Elements and Principles of primary health care – Health care delivery

Household food security and nutrition in emergencies. Public nutrition, sanitation and hygiene and approach to tackle nutritional and health problems in emergencies and ethical considerations (18 Hours)
